...it contains all pertinent info of me as a graphic designer.
 Now for some stats:

_ Skills _

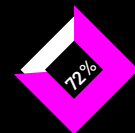

_ Illustration and photo editing _

Well I've spent six years studying and working in the field, I even have a fancy piece of paper telling me I'm good at it. I've taken opportunities to work in team leader and customer service roles. I've heard praise for my ability to adapt to changing environments.

_ 3D-design _

My great passion. As 3D-skills were not the focus of my degree programme, I'm still working hard to master them. Though, that did not stop me from writing my thesis on 3D-design. I've since gained over 16K views for a video game character design.

_ Web design _

The most recent of my competencies. Unsatisfied with with the quality of website creation services, I taught myself HTML and CSS. Besides being able to publish my website, I've also filled in a previous weakness of mine: backend development.
